About Daniel Hulme

Daniel Hulme (PhD) is a leading expert in Artificial Intelligence (AI) and emerging technologies, and is the CEO of Satalia. Satalia is an award-winning company acquired by WPP in 2021 that provides AI products and solutions for global companies such as Tesco and PwC. Satalia's mission is to create a world where everyone is free to innovate and that those innovations become free for everyone.

Daniel is also the Chief AI Officer for WPP and helps define, identify, curate and promote AI capability and new opportunities for the benefit of the wider group and society.

Having received a Master and Doctorate in AI at UCL, Daniel is also UCL's Computer Science Entrepreneur in Residence and a lecturer at LSE's Marshall Institute, focused on using AI to solve business and social problems.

Passionate about how technology can be used to govern organisations and bring positive social impact, Daniel is a popular keynote speaker specialising in the topics of AI, ethics, technology, innovation, decentralization and organisational design. He is a serial speaker for Google and TEDx, holds an international Kauffman Global Entrepreneur Scholarship, and is a faculty member of Singularity University.

Daniel is a contributor to numerous books, podcasts and articles on AI and the future of work. His mission is to create a world where everyone has the freedom to spawn and contribute to innovations, and have those innovations become free to everyone. He has advisory and executive positions across companies and governments, and actively promotes purposeful entrepreneurship and technology innovation across the globe.

Select Keynotes

- **AI and the Future of Innovation**

  In a world where many believe access to more and more data will lead to ever better decision-making, we look at what AI really is, as well as identifying the future organizational and global challenges and opportunities. Daniel will argue why we need to embrace these emerging technologies and will discuss the philosophical and ethical issues surrounding them.
